J. Tanner
Preface 5

R. H. Filby
Introduction 7

Neutron Activation Analysis

V. P. Guinn (Irvine, California, USA)
Past, present, future of neutron activation analysis 9

R. E. Jervis (Toronto, Canada)
Hairs, criminals, moonrocks, metals, diseases, polluters! Where next for nuclear analytical chemistry? 21

M. de Bruin (Delft, The Netherlands)
Present and future position of neutron activation analysis 31

D. A. Becker, R. R. Greenberg, S. F. Stone (Gaithersburg, MD, USA)
The use of high accuracy NAA for the certification of NIST botanical standard reference materials 41

G. E. Miller, T. A. Crofoot, M. C. Manea-Krichten, M. Nault (Irvine, California, USA)
Neutron activation analysis (NAA) in the service of other analyses: Determination of calcium 55

F. De Corte (Gent, Belgium)
Problems and solutions in the standardization of reactor neutron activation analysis 63

E. M. Attas, K. I. Burns, A. Denovan (Pinawa, Manitoba, Canada)
Instrumental neutron activation analysis of high-purity gallium, arsenic, and gallium arsenide 77

Lin Xilei, K. Heydorn, B. Rietz (Roskilde, Denmark)
Limit of detection for the determination of Pt in biological material by RNAA using electrolytic separation of gold 85

B. Smodiš, R. Jaćimović, P. Stegnar, S. Jovanović (Ljubjana and Titograd, Yugoslavia)
Multielement analysis of NIST proposed SRM 1547 Peach Leaves 101

F. Grass (Wien, Austria)
Application of short time activation analysis in the sciences 109

Neutron and Charged Particle Techniques

F. D. McDaniel, S. Matteson, D. L. Weathers, J. L. Duggan, D. K. Marble, I. Hassan, Z. Y. Zhao, J. M. Anthony (Denton and Dallas, Texas, USA)
Radionuclide dating and trace element analysis by accelerator mass spectrometry 119

Elsevier Sequoia S. A., Lausanne
Akadémiai Kiadó, Budapest

P. Fehsenfeld, A. Kleinrahm, H. Schweickert (Karlsruhe, Germany)
Radionuclide technique in mechanical engineering in Germany 141

J. Gomez, G. Blondiaux, B. Hakim, C. Perrin, J. L. Debrun (Orléans, France)
Laser desorption/ablation combined with nuclear analytical methods for materials characterization 153

K. J. Ellis, R. J. Shypailo, H.–P. Sheng, W. G. Pond (Houston, Texas, USA)
In vivo measurements of nitrogen, hydrogen, and carbon in genetically obese and lean pigs 159

W. D. Ehmann, B–F. Ni (Lexington, KY, USA)
A 14-MeV FNAA system for oxygen analysis using a PC microcomputer and multiscaling 169

W. Loveland, K. Aleklett, J. O. Liljenzin, G. T. Seaborg (Corvallis, OR, USA, Nyköping, Sweden, Göteborg, Sweden and Berkeley, CA, USA)
The use of radioanalytical techniques to study intermediate energy, relativistic, and ultrarelativistic nuclear collisions 181

M. A. Lovell, W. D. Ehmann, W. R. Markesbery, J. D. Robertson (Lexington, KY, USA)
Nuclear methods of analysis applied to quantitation in laser microprobe mass spectrometry 191

Kwang–Pill Lee, Sun–Tae Hwang, Y. Yamada, K. Furukawa, Shin–Ichi Ohno (Taejon, Republic of Korea and Tokai-Mura, Ibaraki, Japan)
Ion beam induced emissions from solid europium compounds 203

C. Olivier, H. J. Morland (Stellenbosch, Republic of South Africa)
Average stopping powers and the use of non-analyte spiking for the determination of phosphorus and sodium by PIPPS 211

Developments in Nuclear Instrumentation and Software

M. Gavrilas–Guinn, V. P. Guinn (College Park, Maryland, USA)
Use of the INAA advance prediction computer program on element standards 221

M. T. Mercier, M. J. Koskelo (Itasca, IL and Meriden, CT, USA)
Verification of gamma spectroscopy programs: Accuracy and detectability 233

P. A. Aarnio, T. T. Hakulinen, J. T. Routti (Espoo, Finland)
Expert system for nuclide identification and interpretation of gamma spectrum analysis 245

F. De Corte, M. Carmo Freitas (Gent, Belgium and Sacavém, Portugal)
The correction for γ–γ, γ–KX and γ–LX true-coincidences in k_0-standardized NAA with counting in a LEPD 253

L. Moens, P. Roos (Gent, Belgium)
ROMOS: A new computer code for nuclide identification and concentration calculation in NAA using the k_0-concept 269

S. Landsberger, W. D. Cizek, P. Domagala (Urbana, Illinois, USA)
NADA: A versatile PC based program for neutron activation data analysis 277

P. A. Aarnio, M. T. Nikkinen, J. T. Routti (Espoo, Finland)
SAMPO 90 High resolution interactive gamma spectrum analysis including automation with macros 289

No. 2

Developments in Nuclear Instrumentation and Software (continued)

R. J. Arthur, J. H. Reeves (Richland, Washington, USA)
Methods for achieving ultra-low backgrounds in above-ground germanium detector systems 297

R. Gunnink, A. L. Prindle (Livermore, California, USA)
Nonconventional methods for accurately calibrating germanium detectors 305

G. P. Lamaze, R. G. Downing, J. K. Langland, S. T. Hwang (Gaithersburg, MD, USA and Taejon, Korea)
The new cold neutron depth profiling instrument at NIST 315

A. Türler, H. W. Gäggeler, K. E. Gregorich, H. Barth, W. Brüchle, K. R. Czerwinski, M. K. Gober, N. J. Hannink, R. A. Henderson, D. C. Hoffman, D. T. Jost, C. D. Kacher, B. Kadkhodayan, J. Kovacs, J. V. Kratz, S. A. Kreek, D. M. Lee, J. D. Leyba, M. J. Nurmia, M. Schädel, U. W. Scherer, E. Schimpf, D. Vermeulen, A. Weber, H. P. Zimmermann, I. Zvara (Berkeley, CA, USA, Villigen, Switzerland, Marburg, Darmstadt and Mainz, Germany and Dubna, USSR)
Gas phase chromatography of halides of elements 104 and 105 327

M. R. Smith, E. J. Wyse, D. W. Koppenaal (Richland, WA, USA)
Radionuclide detection by inductively coupled plasma mass spectrometry: A comparison of atomic and radiation detection methods 341

R. L. Brodzinski, H. S. Miley, J. H. Reeves, F. T. Avignone (III) (Richland, Washington and Columbia, South Carolina, USA)
Low-background germanium spectrometry: The bottom line 355

R. Seeymour, S. Hinshaw, T. Nashabishi, C. Cox, B. Coyne, P. Sangsingkeow, W. Graves (Oak Ridge, TN, USA)
Technological innovations in high count-rate instrumentation 363

H. S. Miley, R. L. Brodzinski, J. H. Reeves (Richland, Washington, USA)
Low-background counting systems compared 371

C. M. Castaneda, R. Gearhart, B. Sanii, P. A. J. Englert, D. M. Drake, R. C. Reedy (Davis and San Jose, CA and Los Alamos, NM, USA)
Gamma-ray production cross section from energetic neutron inelastic scattering for the methodical improvements in planetary gamma-ray spectroscopy 387

G. P. Westphal, K. Jöstl, B. Lipp, P. Schröder (Vienna, Austria)
High rate gamma-spectrometry – A status report 395

P. Niskala, V. Pitkänen, R. J. Rosenberg, L. Vänskä (Espoo, Finland)
An automatic NAA analyzer for short-lived nuclides 407

Radiochemical and Radioanalytical Techniques

H. Yoshioka, K. Hasegawa (Shizuoka, Japan)
Radioanalytical application of sub- and super-equivalence method of isotope dilution analysis 417

G. Küppers, G. Erdtmann (Jülich, Germany)
Determination of sub-ppb contents of uranium and thorium in high-purity aluminium by RNAA 425

Y. Meguro, W. Cheng, H. Imura, Z. Yoshida (Tokai, Ibaraki, Japan, Beijing, China and Mito, Ibaraki, Japan)
Synergistic extraction of americium(III) with 2-thenoyltrifluoroacetone and crown ethers 435

Sh. Zh. Luo, M. F. Pu, J. Quao, Zh. L. Liu, Ch. Y. Zhang, P. J. Zhao, Y. B. Fu, H. F. Deng (Chengdu, P. R. China)
A potential bone tumor therapeutic agent ^{153}Sm-EDTMP: its synthesis and preliminary structure analysis 443

C. T. Peng (San Francisco, California, USA)
A method for tentative identification of unknown gas chromatographic peaks by retention index 449

A. Negrón-Mendoza, G. Albarrán, S. Castillo-Rojas (México)
Radiotracer method for the study of the radiolysis of aqueous solutions of pyruvic acid 461

D. A. Miller, S. Sun, J. H. Yi (Northridge, CA, USA)
Preparation of a ^{118}Te/^{118}Sb radionuclide generator 467

N. E. Whitehead, R. G. Ditchburn, W. J. McCabe, R. Van Der Raaij (Lower Hutt, New Zealand)
Factors affecting the electrodeposition of ^{226}Ra 477

S. Ramos-Bernal, A. Negrón-Mendoza (México)
Radiation heterogeneous processes of ^{14}C-acetic acid adsorbed in Na-Montmorillonite 487

E. Sabbioni, M. Bonardi, M. Gallorini, R. Pietra, S. Fortaner, G. P. Tartaglia, F. Groppi (Varese, Milano and Pavia, Italy and Petten, The Netherlands)
Application of radiotracers with high specific radioactivity to metallotoxicological studies 493

Chung-Shin Lee, Wu-Long Cheng (Taiwan, Republic of China)
Chemical process study on the separation of gadolinium-153 505

Yun-Ming Wang, Chung-Shin Lee, Wu-Long Cheng (Taiwan, Republic of China)
Study on the preparation of a ^{137}Cs/^{137m}Ba radionuclide generator 517

Keung-Shik Park, Nak Bae Kim, Hyung Joo Woo, Kil Yong Lee, Wan Hong, Sang Ki Chun (Daejeon, Korea)
Determination of rare-earth elements in steels by radiochemical neutron activation analysis 529

Nak Bae Kim, Keung-Shik Park, Hyung Joo Woo, Kil Yong Lee, Yoon Yeol Yoon, Duk Kyung Kim (Daejeon, Korea)
Determination of U and Th in tungsten by radiochemical neutron activation analysis 539

M. Gallorini, C. Birattari, M. Bonardi, L. Magon, E. Sabbioni (Pavia, Milano, Ferrara and Varese, Italy)
Preparation of high specific activity radiotracers for radioanalytical studies 549
